

NEA Workshop on Stakeholder Involvement: Risk Communication

The main objective of the workshop is to consider the challenges and best practices of radiological risk communication using a cross-disciplinary approach in which experts from all of NEA's committees are invited to participate and share experiences. Stakeholders from member countries are also invited to participate.

The perspectives reflected in the workshop will be comprised of many different expert areas, including nuclear law, regulatory practices, radiological protection, nuclear waste management, deployment of new nuclear facilities, other energy sectors, and communication professionals.

The scope of the workshop includes, inter alia:

- developing and implementing risk communication approaches;
- understanding actors, roles and responsibilities;
- learning from the non-nuclear industry;
- dialogues around risk communication case studies;
- engaging in dialogues with civil society and the next generation; and
- engaging with media and influencers.

To register, please send an email by Friday, August 2nd to stakeholder2019@oecd-nea.org. Kindly include your name, organization and role. Please note that places are limited.

More information and the programme of the workshop can be found at the meeting website: <https://www.oecd-nea.org/civil/workshops/2019/stakeholder/>

We look forward to **your registration** for the NEA Workshop on Stakeholder Involvement: Risk Communication.
